

Scoring Guide: 3 (Actual combined score: 6)

I believe George Lucas deserves to be recognized as the "Man of the year."

There are several reasons why I think George Lucas should be recognized. First of all, he creates fantasies into realities that we ever think of. For example, back in 1985, he introduced to us "Star Wars" which used a lot of special effects, sounds, creatures, robots, customs and miniature spaceships. These kind of great thing made our imaginations came true and helped us to understand more about the future. Second of all, George Lucas also creates western movies that teaches u show life is in the frontier. For example, the film called "Dances with Wolves" with Kevin Costner which was came out last year. This movie was so remarkable because not only it helped us to learn more about Indians. Also, it showed us how humans should live together in harmony and save the lands and animals instead of destroying them. Lastly, George Lucas is not only a great producers, he also a great environmentalist. For example, every years he have contributed a lot of time and his own money working to solve environmental problems, as air and water pollutions. Right now, he's working on a charity funds for Aids program which will really help those patients that needed the cares and try to stay alive.

Therefore, these are the reasons why I believe George Lucas deserves to be recognized as the "Man of the Year".
