# G.E. Upper Division Theme and Diversity Requirements

**A. CHALLENGE OF CHANGE IN THE DEVELOPING WORLD**  
Coordinator: Msia Clark

This theme explores the dilemmas faced by the peoples of Africa, Asia, the Middle East and Latin America as they struggle to overcome legacies of colonialism and economic dependence. The developing countries are characterized by severe social and cultural tensions, physical complexities and challenges to themselves and the rest of the world. Their current integration into the global economy marks a crucial stage in world history. The natural courses assess their physical settings, constraints and possibilities; the social science courses analyze social, political and economic processes of change; the humanities component examines the dynamic interplay among arts, religion and cultural values.
