Revised date: 9/28/15

**NOTE:** a summary of what courses are prerequisites to others is found in a separate document

a. The prerequisite to this course is MATH 1040.
b. For MATH and 2120, if a student earns less than a B-, a 1 unit activity is a required co-requisite.
c. Prerequisite for this course is a score of >50 on ELM or ≥C in MATH 0930
d. Satisfactory completion of GWAR is a pre-requisite. This course must be taken before CHEM 4311 and CHEM 4890
e. Prerequisites: A passing grade on the GWAR, completion of Blocks A and B4, an additional course from Block B, and at least one course each from blocks C and D, and CHEM 3100
f. Students must take a minimum of 2 units of coursework listed under Chemistry and a minimum of 2 units of coursework listed under Biology and Microbiology totaling 7 units which may include a maximum of 1 unit of CHEM 499.
g. GE "double counting": This roadmap already incorporates double counting, so if you follow this roadmap, you won't be taking unnecessary general education courses. These are the GE requirements and the course you will be taking that counts for it: GEB4 Quantitative Reasoning/MATH 2110; GEB1 Physical Sciences/PHYS 2100; GEB2 Biological Sciences/BIOL 1100. This "double counting" saves you 9 units of LD GE coursework. In addition, CHEM 4890 is required and satisfies your UD GE B requirement, saving you 3 more units of UD GE coursework.

Additional GE requirements: One GE course must have an “re” designation (race/ethnicity) and another GE course must have either an “rd” or “d” (diversity) designation. One GE course must have a “wi” designation. Note that some GE courses may have more than one designation (such as cl and d) and that course CAN be used to satisfy both requirements
