What is the ADN-BSN Collaborative Program?

The Cal State LA ADN-BSN Collaborative Program is a self-support program within the College of Professional and Global Education (PaGE) at Cal State LA. It is a collaborative, dual-enrollment program between community college partners and Cal State LA that facilitates seamless academic progression to Cal State LA for ADN-BSN Collaborative program students. Students must be enrolled in the ADN program at the community college and successfully complete the first and second semesters in the ADN program before starting the first Cal State LA summer session. Collaborative program students who successfully meet the Cal State LA program requirements will transition after graduation from the ADN program to the Cal State LA BSN program. This Collaborative Program enables the ADN RN to earn a BSN degree in one year after graduating from the community college. Successful Collaborative students maintain a reserved space in their cohort throughout the BSN program.

How do I become a part of the ADN-BSN Collaborative?

Students in their first or second semester of the ADN program in the Fall semester may be eligible to apply to the ADN-BSN Collaborative Program through their community college nursing program. Each of the 13 community college partner schools evaluates and selects the students they will send forward to Cal State LA to be part of the ADN-BSN Collaborative Program. Each college identifies qualified selected and alternate students. The number of students from each college may vary. If you are interested in becoming a part of the ADN-BSN Collaborative Program, please let your community college nursing counselor and/or director know. They will let you know what the specific application process is at your college. While each community college may have a different application process, all students must meet the same Cal State LA eligibility requirements.

Who should I talk with to get started?

Your Community College ADN Program Director and Counselors can provide you with detailed information. You may also contact the ADN-BSN Collaborative Program staff at Cal State LA:

How much does the program cost?

The ADN-BSN Collaborative Program is a self-support program run entirely through the College of Professional and Global Education. In self-support programs, student fees cover all direct and indirect expenses associated with offering classes and services. While the upfront cost for ADN-BSN Collaborative courses is higher through PaGe ($525/semester unit), the overall tuition for the ADN-BSN Collaborative program is approximately $10,500 less than the traditional BSN program at Cal State LA.

Is financial aid available for this program?

For the first two summer terms at Cal State LA prior to Fall enrollment, students may be eligible for private educational loans from a bank or other lender which will be facilitated through the Cal State LA Financial Aid Office. Once ADN-BSN Collaborative students begin the Fall semester at Cal State LA, they may be eligible for additional forms of financial assistance. Eligibility for financial aid is determined by the information submitted on each student’s FAFSA (Free Application for Federal Student Aid), and will vary for each student. Please see our website for more detailed information about the types of financial aid available to ADN-BSN Collaborative students.
