Using Simple Restore to Import Course Data

Materials and assignments from older courses can be imported into a new course using the Simple Restore feature in Moodle.

Adding the Simple Restore Block

1. Click Turn Editing On.
2. Locate Add a Block.
3. Select Simple Restore from the menu.

1. Locate the Simple Restore block.
2. Click Import All Materials Into Current Course.
3. Filter Courses by searching for the course that has materials you would like to import.
4. Select the Backup File you would like to import materials from.
5. Verify the course name where the imported data will transfer to and click Continue.
NOTE: Depending on the size of the course, the import process may take up to several minutes to complete.

Removing the Simple Restore Block
After completing the course data import, remove the Simple Restore block.

1. Locate the Simple Restore block.
2. Click on the Actions button (gear icon).
3. Click on Delete Simple Restore Block.
