Introduction

Beginning in 1997, the University, under the leadership of President James M. Rosser and the Strategic Planning Coordination Committee (SPCC), adopted a five-year Strategic Plan with the primary objective of implementing activities that reflect Cal State L.A.’s mission and overall vision. The Strategic Plan encompasses 16 Strategic Initiatives and their respective objectives outlined over the course of the last five years. More than one percent of the total budget was allocated in support of these objectives.

From the onset, the SPCC made presentations on the Strategic Plan to faculty, staff, administrators, and students of the six Colleges, the Academic Senate, Associated Students, Inc., Alumni Relations, the University Auxiliary Services, Inc., and other campus groups. This was an opportunity for everyone to provide feedback about the initiatives and objectives outlined. With this valuable and informative input, the SPCC refines the plan, and each subsequent year, in conjunction with the President, evaluates progress to ensure that objectives are fulfilled.

This booklet shares with members of the campus community information regarding the University’s progress in the achievement of established benchmarks. Through significant efforts of faculty, students, staff, administrators, and alumni, the Strategic Plan outlined in 1997 has been realized beyond expectations.

For complete details on the Strategic Plan, updates, the SPCC, or its membership, please visit <www.calstatela.edu/spcc>.

Message from the President

Cal State L.A. is in the midst of a significant planning stage as the campus community assesses the needs and priorities identified approximately five years ago through the formulation of the Strategic Plan. The plan articulates the University’s mission and educational goals, and ensures that resources are allocated to support the achievement of specific objectives. By clearly communicating all elements of the plan, the campus is in a position to make regular assessments, and ultimately to hold itself accountable at every level.

During the next phase of reviewing and revising the Strategic Plan, the role that the entire campus community plays in shaping the University’s goals is pivotal. A strategic plan is most effective and likely to succeed when everyone participates and provides meaningful input regarding the direction of the University. Therefore, I ask all members of the campus community to study the existing plan, and consider providing feedback during this important period of review.

On the whole, the importance of achieving the University Strategic Plan is to make certain Cal State L.A. fosters an enriching and stimulating learning environment for the 21st Century.

James M. Rosser, President
Mission Synopsis

Cal State L.A., a member of the California State University (CSU) system, offers excellent and innovative educational opportunities to an urban student population that reflects the diversity of the Los Angeles basin.

Educational opportunities include:

- Preparing students to appreciate, engage, enhance and transform the social, cultural, civic and workplace structures of American and global societies;

- Providing students with the capabilities, skills, and opportunities to take full advantage of life-long learning, including graduate and professional studies, and opportunities to participate in research, scholarly, and creative activities;

- Offering students tools for personal and academic achievement, economic mobility, and healthier lives;

- Serving as a gateway among the Cal State L.A. community, the greater Los Angeles community, and world community for a shared educational and cultural life;

- Providing high quality professional services to all constituencies of the University.

</table>
Conclusion

Considering the dynamics of higher education, and technological, political and economical changes in the larger community, it is important to re-examine continually Cal State L.A.’s role and general direction. Plans and objectives formulated in the past reflected the institution’s profile and the external environment at that time. Now it is time to assess how those objectives fit the University’s vision for the future.

The 2000/01 Strategic Planning Coordination Committee members are working to review and revise all elements of the original Strategic Plan, including the University’s existing mission synopsis, organizational profile, and the strategy, culture, and value statements. The SPCC also plays a major role in re-evaluating and revising each Strategic Initiative and accompanying objectives, determining effectiveness and value.

Therefore, during this period of assessment, some initiatives may be modified, others dropped, or added to accurately reflect Cal State L.A.’s direction for the next five years.

All project updates and progress will be documented continuously and publicly available on the official SPCC Website at <http://www.calstatela.edu/spcc>. On the Website is also a bulletin board for faculty, staff, and students to participate in conversations and provide feedback to each other and committee members about these issues. Ultimately, this exchange and all comments will be taken into consideration as the final report is developed.

The final revised Strategic Plan 2001 Report will be released to the campus community in Fall 2001.
