

**Michael Harrison** of the Department of Geosciences and Environment received the 2016-2017 Outstanding Graduate Student Award from the College of Natural and Social Sciences at CSULA. The award is given each year to two graduate students in the College and may be awarded up to one year after completion of the MS. Mike had a solid GPA in his coursework, an impressive publication record including 10 abstracts and 4 first-authored and co-authored papers, awards for presentations, and meritorious service to CSULA and to the hydrogeology profession. Mike's MS was awarded during summer 2016. His research integrated isotope hydrology with standard hydrological techniques to investigate sources of nutrients and trace elements in a Southern California watershed. The work investigated urban runoff and groundwater baseflows as sources of these constituents; sourced from both natural and anthropogenic inputs. Mike is currently a Ph.D. student at Oregon State University.
