“There is no such thing as a neutral educational process. Education either functions as an instrument which is used to facilitate the integration of the younger generation into the logic of the present system and bring about conformity to it or it becomes the “practice of freedom”—the means by which men and women deal critically and creatively with reality and discover how to participate in the transformation of their world.”
- Paulo Freire, 1973.

COVID-19 Learning Statement:

Your success in this class is extremely important to me. I am aware that we are experiencing multiple pandemics (COVID-19, economic crisis, and the unmasking of structural racism) and that we are all affected by this reality in different ways. If you need extra support or if an emergency arises please let me know as soon as possible. Together we will come up with a plan to ensure that you finish the semester by meeting the requirements for the course. The university offers multiple resources to support students during these challenging times. I encourage you to seek some of these resources.

Course Structure:

This course will be taught hybrid. That is, we will alternative between meeting in person and via Zoom. During Zoom class sessions, you are expected to be fully present and actively participate through the Chat box and during break out room activities.

University Catalog Description:

Introduction to language acquisition, and related cultural aspects of learning in urban classrooms; analysis, application, evaluation of strategies for teaching language arts for first and second language development strategies

Course Description:

This course will provide scholars with the background, skills, and knowledge necessary to support elementary school emergent bilingual (EB) students (bureaucratically labeled as English Language Learners (ELLs)). Scholars will review policy, research, theory, and best practices as they relate to the educational experiences of EBs. This includes an analysis of past and present language policies, diversity

of EBs, program models, first and second language acquisition theories, culturally responsive practices, assessments, and the integration of content and language instruction. Special attention will be given to the pedagogical approach of integrated and designated English language development.

Professional Statements:

A. Theme and Conceptual Framework for Professional Preparation

The faculty members of the College of Education have adopted the organizing theme of "Preparing Educators to Serve the Culturally and Linguistically Diverse Population of Urban Schools and Related Institutions of the 21st Century" for all programs for professional educators at California State University, Los Angeles. This theme is reflected in this course content and performance standards; lecture topics; suggested readings; and rubrics described in this syllabus. The diagram at the end of the syllabus provides the conceptual framework for the theme and supports the preparation of professional educators by the members of the Cal State LA College of Education faculty.

B. Statement of Reasonable Accommodation

The College of Education faculty members fully support the Americans with Disabilities Act (ADA). The members of the faculty will provide reasonable accommodation to any student with a disability who is registered with the Office of Students with Disabilities (OSD) who needs and requests accommodation. The faculty member may wish to contact the OSD to verify the presence of a disability and confirm that accommodation is necessary. The OSD will arrange and provide for the accommodation.

Reasonable accommodation may involve allowing a student to use an interpreter, note taker, or reader; accommodation may be needed during class sessions and for administration of examinations. The intent of the ADA in requiring reasonable accommodation is not to give a particular student an unfair advantage over other students, but simply to allow a student with a disability to have an equal opportunity to be successful.

OSD is located on the first floor of the Administration Bldg. Room 127 (near Financial Aid and Registrar). The office can be contacted at OSD@calstatela.edu or (323)343-3140.

C. Student Conduct

Student conduct is viewed as a serious matter by the faculty members in the College of Education (COE). The COE faculty members assume that all students will conduct themselves as mature citizens of the campus community and will conduct themselves in a manner congruent with university policies and regulations. Inappropriate conduct is subject to discipline as provided for in Title 5, California Code of Regulations (see Student Conduct: Rights and Responsibilities, and Student Discipline, Cal State LA eCatalog). Academic honesty is expected of all students in the College, in accordance with University policy. There are established university reporting procedures if a student is suspected of committing an academically dishonest act.

*****Please read relevant sections of the APA manual regarding plagiarism and academic scholarship*****

D. Technology

Courses in the College of Education require a high level of technological literacy along with access to current technology in order to assure student success. In all undergraduate, credential, certificate and graduate courses, students in the CCOE are expected to:

- Have access to an internet accessible device that will meet the technology requirements of the course in which the student is enrolled.
- Have sufficient working knowledge of this device, its applications and operating system to use it for their classes, as well as how to keep its operating system and applications up to date.
- **Use a Cal State LA email account for all course and university-related communication.**
- Access the current campus learning management system (e.g., Canvas) on a regular basis as required by the course in which they are enrolled.
- Use campus technology resources including the Cal State LA portal, Open Access labs and ITS Help Desk as needed.

Students should anticipate that their use of these skills will be integrated into courses within their programs. Students who are unable to meet any of the above expectations are strongly advised to take an introductory technology course or ITS workshop upon enrollment in the College of Education.

Land Acknowledgment

Every community owes its existence and vitality to generations from around the world who contributed their hopes, dreams, and energy to making the history that led to this moment. Some were brought here against their will, some were drawn to leave their distant homes in hope of a better life, and some have lived on this land for more generations than can be counted. Truth and acknowledgment are critical to building mutual respect and connection across all barriers of heritage and difference. We begin this effort to acknowledge what has been buried by honoring the truth. We are currently occupying ancestral land of the Tongva people. In our work to promote social justice in education we must always consider the many legacies of violence, displacement, migration, and settlement that bring us together here today.

This statement is drawn from the U.S. Department of Arts and Culture #HonorNativeLand initiative. You can learn more here (<https://usdac.us/nativeland>) and through additional resources posted on our course Canvas page.

Identity Slide (2 points)

TPE 6.1 (A), 7.1.1

The purpose of this assignment is for you to share an image of an object that represents you and another one that represents your ancestors/ family. We will share our slides as part of our introduction (narrative medicine) during our first session. Questions to consider: What is something that represents your identity/

identities and/or “swag/vibe”? What is something that you believe represents the identity/ identities of your family/ ancestors? This is an opportunity to think about your localized cultural practices and your heritage culture.

Language Learning Reflection (5 points)

TPE 6.1 (PA), 6.2 (IP), 7.3 (A)

The purpose of this assignment is for you to reflect on your experience learning a second language through a written or visual piece. You can create a *testimonio* (counterstory), reflection, letter to a former teacher, poem, spoken word piece, children’s book, painting, photograph, zine, Tik Tok video etc. The creative possibilities are endless! If you opt for a written piece, it should about two pages long. If you decide to go with a visual reflection (photograph/ painting/ children’s book etc.) please include a one-page reflection that describes your experience in relation to the piece you created. Consider the following in your reflection:

Describe your earliest memories of using language in your family.

What influences did parents, siblings, baby-sitters, teachers and other significant role models have on your first and second language development?

Did your family have oral traditions?

Did the media have a negative or positive influence on your desire to speak and read in your home language? What about in the second/ additional language?

Was your second/additional language learning experience positive (additive) or negative (subtractive)?

How was the environment in which you began learning and using your second/additional language?

What helped you learn the second/additional language? Or what hindered your learning?

How proficient did you become in your second/additional language?

Did the education system support your primary/ home language? How?

Definition of Testimonio (Counterstory) (As provided by José Medina in *Lo que se dice Study Guide*)

Testimonios, or testimonies, are the stories that each student or person lives through and that shape who they are and who they will become. These personal stories may have an emotional, social, or political impact on those who listen to and/or read the account.

As part of the educational experience, *testimonios* have the power to give voice to those students who may not have had one in the past, to illuminate obstacles that have been overcome, and, more importantly, to create a sense of community where each child is valued and respected regardless of background or language

EB Teacher Interview (10 points)

TPE 1.6 (PA), 4.7 (I), 5.1 (I), 5.2 (I), 5.8 (I), 6.1 (IPA), 6.7 (IPA), 7.10 (IP)

The purpose of this assignment is for you to explore how teachers of EB students support and perceive their EB students (bureaucratically labeled "English language learner"). By conducting an interview, you will gather insights into their knowledge and perceptions of language acquisition as well as learn more about how teachers support EB students. You will also write a report where you will reflect on the interview in relation to the course material.

Tasks:

1. Recruit a teacher who works with bureaucratically labeled English language Learners (ELLs)
2. Develop interview questions. Consider the following themes:
 - o Program model (i.e dual language, English- only)
 - o Understanding of second language acquisition
 - o Knowledge of English language learners
 - o Classroom supports/ scaffolds for English language learners
3. Write 2 to 3 page (double-space) final report. The organization of the paper should contain the following elements:
 - o an introduction of your interviewee; your rationale for selecting this person; (@.5pg)
 - o a description of how the interviewee understands language acquisition
 - o information on the program model this teacher works in
 - o the supports/ approaches the teacher utilizes to support EB students
 - o conclude your paper by describing what you learned from this interview in relation to the course material and how it will influence you as a teacher of EBs. You should have at least four explicit connections to the course material (@.5pg)

CONCEPTUAL FRAMEWORK

VISION:

The College of Education is a learning community of faculty, administrators, staff, students, and community members that work collaboratively to ensure that all students receive a high-quality education, honor the diversity of all learners, advocate for educational and community reforms, develop reflective practices that promote equity, and facilitate the maximum learning and achievement potential of all children and adults.

MISSION:

The COE mission is to develop in students the professional knowledge, skills, and dispositions to promote the academic, social, and psychological development of diverse learners in urban schools and related agencies. COE graduates become teachers, special educators, school administrators, educational technologists, researchers, program evaluators, school psychologists, counselors, rehabilitation professionals, higher education faculty, and other education specialists. Within an environment of shared governance, COE professional preparation programs utilize data-driven decision-making, technology-integrated instruction, meaningful curricula, and outcome-based assessments to ensure high-quality educational opportunities for all students.

CORE VALUES:

The College of Education prepares outstanding and caring educators, counselors, and leaders to work with diverse learners in urban schools and related agencies guided by the following core values.

EDUCATIONAL EQUITY

We believe in creating inclusive learning environments with equitable educational opportunities for all learners, including those with disabilities and those from diverse culture, linguistic, and socioeconomic backgrounds. We believe everyone can learn if given the opportunity and support. We honor the dignity of every individual and hold high academic expectations for all learners. We value diversity because it enriches the quality of everyone's learning.

PROFESSIONALISM

We believe professionalism is mastery of the body of knowledge for one's discipline and the demonstration of cultural, technological, ethical, and professional competencies. COE courses and professional preparation programs are designed to teach professional dispositions, skills, and/or knowledge.

COLLABORATION

We believe that collaborations and partnerships among COE faculty and staff, students, schools, families, and community organizations enhance educational excellence, urban school and related agency transformations, and educational access and equity for all learners. Meaningful and lasting educational collaborations and partnerships are grounded in understanding the complexity of all stakeholders' needs and their interdependence, and we advocate that all COE professional preparation programs build collaborations and partnerships.

REFLECTIVE PRACTICE

We believe that COE students should develop reflective practices, including self-assessment strategies to foster professional growth. We promote the deliberate application of knowledge to practice and the constant reflective analysis of one's practice in relation to school and/or community needs.
