

FREQUENTLY ASKED QUESTIONS

CSU Minidrone Competition

Q1. Does a pilot need a Pilot license such as Part 107?

A1. For the CSU Minidrone Competition, no FAA license is necessary. As you develop your interests in flying sUAS, we recommend joining the Academy of Model Aeronautics and earning the FAA Trust Certification.

Q2. Can a team register in the CSU Minidrone competition if they are not registered in the C-UASC competition?

A2. Yes. Although the CSU Minidrone competition and the C-UASC competition are both taking place at the Mojave Air & Space Port on June 22, 2024, they are separate events. Teams may register in one or the other (or both). The CSU Minidrone competition is designed to be well-suited for beginners in the field.
