New Features & Improvements

Accessibility

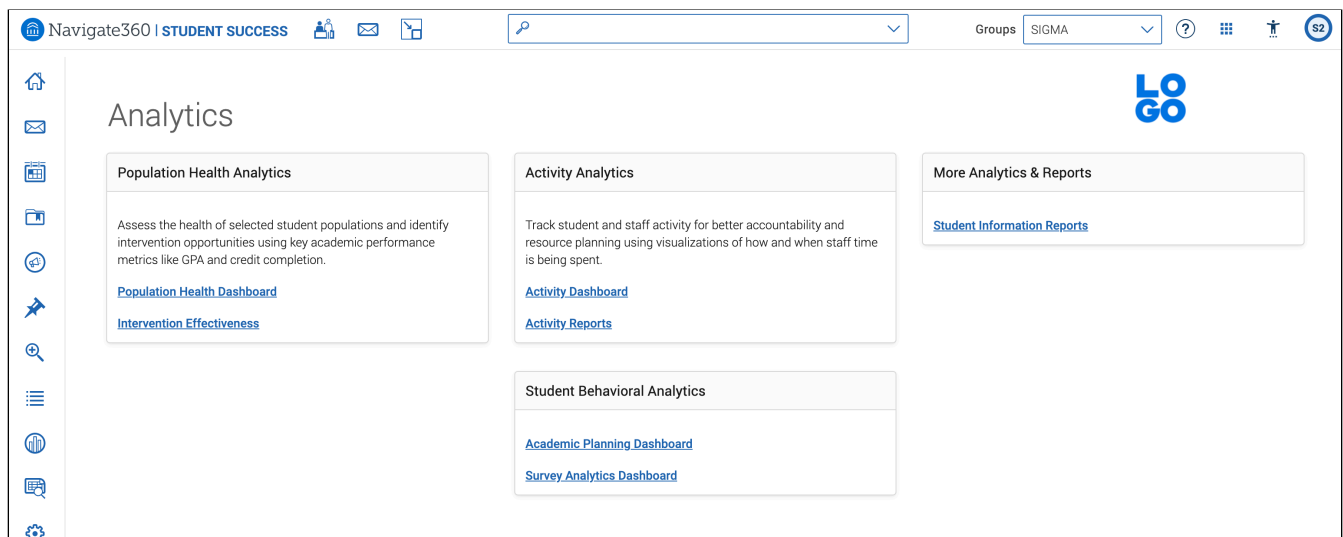

Analytics

As part of our accessibility improvements, the Analytics main page has been switched to a "three column" view.

Before:

After:

Various Features

As part of our continued accessibility work, Navigate360 has made accessibility improvements and fixes for the following areas of the Navigate360 for Student Success: Staff and Student Home.

Data Imports and API

Custom Attributes API Documentation

We have added Custom Attributes documentation to our API documentation (the API already existed). An example of what users should see is displayed below.

Create user custom attributes' job

POST /api/v3/user_custom_attributes

Creates an import job to upload user custom attributes data.

Refer to [Create a job](#) to know more about the different flows and modes available, request parameters, and response payload.

Refer to [Create a collection](#) to know more about how to create a collection of jobs.

Download [here](#) a file sample to import this data type.

Before any Custom Attribute data can be loaded into Navigate360, the application administrator needs to configure them on the [Custom Attributes Field Configurations page](#).

You can add up to 90 Custom Attributes: 50 short answer attributes, 20 decimal (number) attributes, and 20 date attributes.

This feature supports upsert operations only. When you provide configured keys, the system will create new attributes if they don't exist or update existing attributes with new values.

To delete a Custom Attribute, set its value to an empty string ("").

Example command:

```
curl -u username:api_key -XPOST 'https://eabuniversity.campus.eab.com/api/v3/user_custom_attributes?bulk=true&mode=upsert'
```

Parameters

bulk
boolean
required
This parameter dictates the flow:

BODY SAMPLE (CLICK TO EXPAND)

```
{
  {
    "student_id": "123",
    "custom_attribute_1": "Green;Blue",
    "custom_attribute_2": "0.1347",
    "custom_attribute_3": "05/11/1998"
  }
}
```

BODY SCHEMA (CLICK TO EXPAND)

UserCustomAttributeAttributes

student_id <small>string</small> (required)	The unique identifier of the user.
custom_attribute_1 <small>string</small>	Custom Attribute configured in admin can configure import name and data type here .
custom_attribute_2 <small>decimal</small>	Custom Attribute configured in admin can configure import name and data type here .
custom_attribute_3 <small>date</small>	Custom Attribute configured in admin can configure import name and data type here .

RESPONSE SAMPLE (CLICK TO EXPAND)

```
{
  "data": {
    "job": {
      "id": 10,
      "entity_name": "user_custom_attributes",
      "location": "https://generated/presigned/url/to/s3",
      "timeout": 300,
      "mode": "upsert",
      "status": "in progress"
    }
  }
}
```

V3 Reports

Bulk Action on Journeys in V3 Reports

Note. This was added in the STA 25.2 release but not mentioned in release notes. It is already available to users with permissions.

Users with the permission to view the Journeys Report and the *Bulk Assign Journeys to Students from reports and search* from Non-Care Unit Permissions and Data Access drawer can assign journeys and bulk update journey step status from the report results. In this way, users with access can complete multiple steps across students and Journeys at once.

Fixes

Accessibility

As part of our accessibility changes, some text on the Student Profile Overview tab could be smaller due to CSS errors. This has been fixed and the smaller text should no longer be an issue.

Various Fixes

- Fixed an issue where Advanced Search filters would clear after the user sent a mass text.
- Fixed an issue where student absence emails were not displaying correctly to students and their assigned advisors.
- Fixed the success and error file location URL for the Get an Import Job API.
- Fixed an issue where the Students report was not returning results when the partner tried to combine more than one filter based on Custom Attributes. This should now be fixed.
- Fixed an issue where merged prospect profiles' Event RSVPs were not updating properly.
