

The background image shows a woman with dark hair, wearing a dark blue patterned dress, working in a museum or laboratory. She is leaning over a table covered with a blue cloth, examining small fossil specimens. On the table are several fossil shells, including a large, dark, spiral shell on the left and a white, spiral shell on the right. In the background, there are wooden cabinets with many small drawers, each labeled with a tag. A large, colorful geological chart is mounted on the wall behind her, showing various geological periods and their corresponding colors. The chart includes labels for the Cambrian, Ordovician, Silurian, Devonian, Carboniferous, Permian, Triassic, Jurassic, Cretaceous, Tertiary, and Quaternary periods. The text is overlaid on the left side of the image, partially obscuring the background.

California State University of Los Angeles
Department of Biological Sciences BIOL 5100:
Graduate Seminar
Presents:

DR. JANN VENDETTI

**Topic: Lands snails of Southern
California: a dynamically changing
fauna and why you should care**

Date: Thursday, October 7th

Time: 3:10 – 4:00 pm
