Revised date: 9/28/15

NOTE: a summary of what courses are prerequisites to others is found in a separate document

b. For MATH 2110, 2120, 2130, if a student earns less than B-, a 1 unit activity is a required co-requisite.

d. Satisfactory completion of GEAR is a pre-requisite. This course must be taken before CHEM 4431 and CHEM 4890

e. Choose 2 of 3 possible 45XX Advanced analytical courses

f. Prerequisites: A passing grade on the GEAR, completion of Blocks A and B4, an additional course from Block B, and at least one course each from blocks C and D, and CHEM 3100

g. A total of 4 units of UD CHEM electives, which may include a maximum of 1 unit of CHEM 499

h. GE "double counting": This roadmap already incorporates double counting, so if you follow this roadmap, you won't be taking unnecessary general education courses. CHEM 4890 is required and satisfies your UD GE B requirement, saving you 3 more units of UD GE coursework.

Additional GE requirements: One GE course must have an "re" designation (race/ethnicity) and another GE course must have either an "re" or "d" (diversity) designation. One GE course must have a "wi" designation. Note that some GE courses may have more than one designation (such as cl and d) and that course CAN be used to satisfy both requirements
