

Ethanol, also known as ethyl alcohol, is a colorless flammable liquid that has a pungent taste. Produced by fermentation, it is the alcohol found in alcoholic beverages and used as a solvent.

Ethanol, C_2H_5OH or C_2H_6O , is flammable, colorless, and slightly toxic. Drinking alcohol is produced by fermentation, when certain species of yeast metabolize sugar in the absence of oxygen, they produce ethanol and CO_2 .

Ethanol is the alcohol found in common alcoholic beverages. It is flammable and dissolves in water. Ethanol has many uses besides alcohol, such as fuel, vinegar, feedstocks, and hand sanitizer.

Ethanol is best known for the alcohol in alcoholic beverages. Ethanol is produced both as a petrochemical, through the hydration of ethylene, and biologically, by fermenting sugars with yeast.

Ethanol, also known as ethyl alcohol, C_2H_5OH , is a colorless flammable slightly toxic compound that is made in fermentation and is used as a solvent and as an antifreeze.

Ethanol also known as ethyl alcohol because it is commonly known as the alcohol found in alcoholic beverages. It is a flammable, colorless, and slightly toxic chemical with the molecular formula C_2H_5OH .

Ethanol is a flammable, colorless, slightly toxic chemical compound. It is best known as the alcohol in alcoholic beverages. Its molecular formula is C_2H_5OH .
It is a clear, colorless liquid

Ethanol's molecular formula is C_2H_5OH . Ethanol, also known as ethyl alcohol, drinking alcohol, or grain alcohol is a flammable, colorless, slightly toxic chemical formula.

Ethanol, is a flammable, colorless, and slightly toxic chemical compound. It's best known as the alcohol found in alcoholic beverages. It's also used as a fuel.

Ethanol, C_2H_5OH , is a colorless volatile flammable liquid synthesized by fermentation of sugars and starches. It is widely used as a solvent and in drugs, cleaning solutions, etc.

Ethanol, CH_3CH_2OH , is a colorless liquid with distinctive taste and odor. It is used as a solvent in the manufactures of perfume and varnishes. It is flammable and also called alcohol.

Ethanol, C_2H_5OH , is a flammable, colorless, slightly toxic chemical compound sometimes simply referred to as alcohol. Combustion of ethanol forms carbon dioxide and water.

Ethanol is a combustible, toxic compound. It has many names, including ethyl, drinking, or grain alcohol. It is best known as simply alcohol and is found in drinks.

Ethanol is a colorless, flammable chemical compound that is best known for its use in alcoholic beverages. The hydroxyl group of ethanol is its main point of interest in chemistry.

Ethanol; is a flammable, colorless, slightly toxic chemical compound, and is best known as the alcohol found in alcoholic beverages. In common usage, it is often referred to simply as alcohol.

Ethanol: Ethanol or C_2H_6O is a flammable, colorless, mildly toxic chemical compound, and is widely known as the type of alcohol found in alcoholic beverages. It is also a versatile solvent.

Ethanol; Ethanol, a colorless liquid with a pleasant smell that is produced naturally from fermentation by yeasts and other microorganisms. It is used in alcoholic beverages, as a solvent, and in the manufacture of other chemicals.

Ethanol is a somewhat toxic and colorless compound. Ethanol-water solutions that are more than 50% ethanol are very flammable. Ethanol is best known for being alcohol in alcoholic drinks.

Ethanol; C_2H_5OH ; is a clear, colorless alcohol. It is made from distillation of fermented starch. It is a good solvent, creates other chemicals, and can be mixed with gasoline.

Ethanol: Ethanol is also known as an alcohol mainly known as drinking alcohol and it has the characteristics of being: flammable and moderate toxicity with the atomic formula C_2H_5OH .

Ethanol: A compound made up of two carbon atoms six hydrogen atoms and one oxygen atom. It is colorless and a toxic compound. Often referred to simply as alcohol.

Ethanol, known as ethyl alcohol, it is used in alcohol beverages. Also it is a of

grain alcohol. Is a flammable, colorless, slightly toxic chemical compound, its molecular formula is C_2H_5OH

Ethanol, also known as ethyl alcohol, drinking alcohol or grain alcohol, is a flammable, colorless, slightly toxic chemical compound, and is best known as the alcohol found in alcoholic beverages.

Ethanol is a flammable, colorless, and slightly toxic chemical compound. Ethanol is best known as the alcohol found in alcoholic beverages. Ethanol is often referred to as alcohol.

Ethanol is a colorless volatile flammable liquid, C_2H_5OH , synthesized or obtained by fermentation of sugars and starches and widely used, either pure or denatured, as a solvent and in drugs, cleaning solutions, explosives, and intoxicating beverages.

Ethanol:

It is a clear, colorless liquid with a characteristic, agreeable odor. In dilute aqueous solution, it has a somewhat sweet flavor, but in more concentrated solutions it has a burning taste. Ethanol, CH_3CH_2OH , is an alcohol, a group of chemical compounds whose molecules contain a hydroxyl group, $-OH$, bonded to a carbon atom.

Ethanol is a colorless, flammable, chemical compound. It is found in alcoholic drinks. Its molecular formula is C_2H_5OH . Ethanol's molar mass is 46.06844(232)g/mol. Its melting point is 158.8 K and its boiling point is 351.6 K.

Ethanol, CH_3CH_2OH , is a grain alcohol. It is also flammable and colorless with a very distinct odor. It can also be toxic, however it is used as a solvent.

Ethanol; Ethanol is a flammable, colorless, slightly toxic chemical compound. It is best known as alcohol. Its molecular formula is variously represented as $EtOH$, CH_3CH_2OH , C_2H_5OH .

Ethanol; Ethanol is a slightly toxic chemical compound. It is best known as the alcohol found in alcoholic beverages. It is also flammable and colorless. Its molecular formula is variously represented as $EtOH$, CH_3CH_2OH , C_2H_5OH .

Ethanol is a colorless, flammable, and slightly toxic chemical compound.

The public probably knows ethanol best as the alcohol found in alcoholic beverages. Ethanol is produced as petrochemical or by fermenting sugars with yeast.

Ethanol is a colorless, flammable, slightly toxic chemical compound. Ethanol is used in most of the alcoholic beverages. Most of the time ethanol is known as alcohol.

Ethanol also known as ethyl alcohol is flammable, colorless, and slightly toxic. It is found in alcoholic beverages. In a dilute aqueous solution it has a sweet flavor, but in more concentrated solutions it has a burning taste.

Ethanol is a flammable, colorless, slightly toxic chemical compound, and is best known as the alcohol found in alcoholic beverages. The largest single use of ethanol is as a motor fuel.

Ethanol is a flammable, colorless, and slightly toxic chemical compound. It can easily be found in alcoholic beverages. Lastly, it is also widely known as alcohol.

Ethanol ($\text{CH}_3\text{CH}_2\text{OH}$); is a clear, colorless liquid. It is made up of a group of chemical compounds whose molecules contain a hydroxyl group, $-\text{OH}$, bonded to a carbon atom.

Ethanol is a flammable, colorless, and slightly toxic chemical compound. It can easily be found in alcoholic beverages. Lastly, it is also widely known as alcohol.
