Rocketship Public Schools is a network of public elementary schools committed to closing the achievement gap in the Bay Area, Milwaukee, Nashville and DC.

Looking for a new role here in the Bay Area? We are currently hiring teachers and school leaders for our schools in San Jose, Redwood City, Concord and Antioch.

**Teachers**

Rocketship teachers are content experts who specialize in either Humanities or Math/STEM and have a personalized coach to guide them professionally and to partner with them on the academic and social elements of their classroom. Additionally, Rocketship knows the value of an engaged family community, so teachers partner with parents and families to ensure the success of each student. Just as our teachers work to support the successes of their students, we work to support our teachers.

**Special Educators**

Rocketship runs an inclusion model so all of our students, regardless of an IEP, are in the general education classrooms for the majority of the day. No matter your role at Rocketship, every student is your student. Our education specialists are able to push into classrooms to work with small groups and do pull out services that align to students’ IEPs. Just like our Humanities and Math/STEM teachers, our education specialists receive personalized coaching and network support.

**This is Hard Work, But it’s Worth It**

Working to eliminate the achievement gap can be exhausting, frustrating, even heartbreaking at times. Every day brings a new challenge. Rocketship teachers, parents, and school leaders work together to solve every new riddle our Rocketeers throw at us. And that’s what makes the lightbulb moments all the more gratifying. This is hard work, but it is worth it.

Rocketship offers competitive salaries and benefits, a cell phone reimbursement and a California housing stipend to support teachers in this meaningful work. Our teachers consistently share that the people they work with are passionate, committed educators who believe in all students. Come check us out, we think you could fit right in!
