Position: Science Faculty (part time)

About Portal
Portal Schools is an emerging network of microschools where students simultaneously attain a high school diploma and Bachelor’s degree. Our school’s campuses are shared with partnering corporations, giving students the opportunity to dive into exciting, hands-on internships, and obtain a diverse range of invaluable learning experiences and skill development. We serve an intentionally diverse student population through a model that is student-centered, competency-based and career focused. Portal Schools is opening doors to opportunity for all and empowering students to successfully launch into careers.

Job Description
To serve as a specialty instructor faculty member at Portal Schools - an innovative new school model blurring the lines between high school and college. Coaches will provide secondary instruction and related student support to a cohort of students enrolled in grades 9-12. Specialty Instructors will teach courses and provide support around coursework led by our higher education partners (when applicable).

Responsibilities
- Deliver on the vision and mission of Portal Schools with students
- Teach, facilitate, and coach student cohorts in subject-specific coursework
- Work with individual students or small groups to reinforce learning material or skills introduced in the curriculum, providing necessary supports and intervention as needed
- Facilitation of competency-based college course work and corresponding projects (where applicable)
- Develop core or supplemental curriculum for competency-based coursework as needed or assigned by Head of School
- Manage competency-based learning platform and assessments for your course
- Support in the development of and implement curriculum focused on socioemotional learning, professional skills, and workforce skill development, as it relates to subject area
- Support student recruitment and outreach, information meetings, onboarding and enrollment management (as needed, where applicable)
- Provide office hours at least once a week for additional personalized support
- Other duties as assigned by the Head of School

Qualifications
- Belief in the Portal Schools model and non-traditional approaches to student learning
- Demonstrates successful experience in either college teaching and/or secondary school teaching preferably in core subject area: science (required)
- Experience working in independent schools (preferred)
- Strong desire to mentor students in a variety of areas in an innovative work setting
- Works well: with students, with parents, with a team on collaborative projects
- Proficiency in Google Drive, competency-based platforms, and other student facing technology to maximize the student learning experience and efficiency
- Bachelor’s Degree in a related field (required)
- Holds teacher or counselor certification (preferred)
