Note: This assumes no remedial courses (satisfactory score on ELM and EPT) but not yet ready for MATH 206, the first course of the major program.

Note: This is only one possible roadmap that a student may take. There are many ways to organize the classes for this option of the mathematics major. Consult the course catalog to determine other roadmaps.

(\*) Other choices are possible instead of this course. Check the Catalog listings for these.

(\*\*) In order to graduate a student must take 60 UD units. These are upper division free electives from any department that the student might need to take to satisfy this requirement.

(\*\*\*) In order to graduate a student must take 180 total units. These electives are to so that the student has 180 units. They can be any course.

Note: Related area courses are the lower division elective courses that math majors must take. The approved electives list is posted on math dept. website.

Note: When choosing your upper division theme courses note that you must take one course from each sub-theme (natural sciences and math, social sciences, humanities)

Note: Every student must take 2 diversity courses. These are marked with a (d) in the course catalog.
