

CSU LOS ANGELES IN-HOUSE CONTROLLED SUBSTANCES DISPOSAL PROCEDURES

- A. Once the Controlled Substance is deemed ready for disposal (waste), the generator /registrant will contact CSULA's **Environmental Health & Safety (EH&S) Office** and arrange a suitable time for the pickup of the Controlled Substance Waste.

- B. Upon arrival, EH&S will sign/date a form to signify the transfer of custody of the Controlled Substance Waste from the generator/registrant to EH&S.

- C. EH&S will transport the Controlled Substance Waste to the **90 Day Hazardous Waste Storage Area** where they will incorporate the Controlled Substance Waste into the appropriate Hazardous Waste Stream, compatible with the Controlled Substance Waste, which will render the Controlled Substance Waste inactive, irretrievable and undetectable. (*Ex. Halogenated or Non-Halogenated Waste Solvents, Toxic Waste Solvents, Corrosive Waste Liquids, etc...*)

- D. The Inactivation of the Controlled Substance Waste will be witnessed by an Officer or Patrolman of the **CSULA Campus Police** and one of the following individuals: a licensed **Physician, Pharmacist** or **Nurse**. The date, time and witnessing individual information will all be recorded and maintained by the EH&S Office.
