

Advising Platform Data Current Students	
Usage	An advising platform that allows professional advisors and faculty easy access to information to help students make informed and appropriate decisions.
Data Source	GET
Population and type of data	Term, course and enrollment data for any <ul style="list-style-type: none"> ▪ undergraduate¹student ▪ in a degree granting program ▪ who is enrolled for any term beginning with the term that was active one calendar year back from the current date, including future terms
Frequency of Update	Updated nightly. Any changes made to a student's record in GET will be reflected in SSC Campus the next day.
Things to know	All unit data for quarter-based courses prior to semester conversion (Fall 2016) display as semester units in the platform. For example, a 4-unit quarter course will display as 2.66 units. (4.0 x .66667)

Historical/Analytic Data Past Students	
Usage	Using a custom model built for Cal State LA, SSC Campus predicts a student's successful progress by making comparisons to the pace of students who have successfully graduated in the desired major over the past 10 years.
Data Source	GET
Population and type of data:	Ten years of historic data for undergraduate degree seeking students
Frequency of Update	Each Academic Year

¹ Graduate students will be added in Phase II
