

**Charge of the Department of Chemistry and Biochemistry Instructional Affairs
Committee**

Whereas the development, maintenance and continued development of the curriculum is the responsibility of the Department, IAC supports these efforts in the following ways. The committee works to review curriculum, to establish course articulation agreements, and to implement assessment committee recommendations that will support student learning and achievement in the Department of Chemistry and Biochemistry programs. The role of the committee is to

- develop recommend solutions to address curricular problems,
- promote improvements in all aspects of curriculum and instruction including scheduling,
- coordinate activities and initiatives within the department, and
- address issues and problems as assigned by the Department.
