RAP-2B

SELF-SUPPORT OPERATIONS

Dept/Auxiliary: College of Business and Economics

Division: Academic Affairs

Fund Code(s): SF001

Fund Description: Graduate Business Professional Fee

Prepared By: Dr. Edward Hsieh

Mission Statement

The Graduate Business Professional Fee serves to support program growth as well as professional and scholarly development of faculty, staff and students under the AACSB guidelines of accreditation.

- 1. Operational Overview Describe the services provided. (Include detailed description of objectives; type of services provided to the University and constituent(s), the operational impacts, and how the operation will further the objectives and success of the University).
- 6.1 Enrollment growth in professional master's degree programs in business, consistent with campus strategic plans.
- 6.2 Growth in enrollment diversity in such programs, including improved representation of persons of modest financial means, improved representation of persons from currently underrepresented groups, and a more balanced gender representation among students.
- 6.3 Support for students through such means as providing internships and placement assistance at the completion of their graduate business programs.
- 6.4 Improvements in full time faculty recruitment and retention.
- 6.5 For programs that seek accreditation by the Association to Advance Collegiate Schools of Business International, maintenance of accredited status.

2. Measurable Outcomes - How is Success Defined?

Success can be measured on the metrics defined under the AACSB accreditation guidelines. These include: more students enrolling and completing graduate programs, more internships and placement, higher pass rate on professional tests, ability to attract and retain faculty, and continued re-accreditation by AACSB.

3. Sustainability Plan – How will you continue to achieve operational success? (Use of funds, detail how objectives were met; if applicable, justify future use of any increase in funding).

The Graduate Business Professional Fee will continue to be used in the following areas: 1. Support faculty scholarly development (number of presentations at professional conferences, number of peer reviewed journal articles published, AACSB faculty qualification ratios); 2. Support staff professional development (number of conferences, workshops, or seminars attended); 3. Support student professional development (number of competitions attended and rankings, number of professional presentations at conferences, number of internships, job placement).

4. Assessment Method - How will the outcomes identified in #2 be specifically measured?

Outcomes can be measured mainly on the metrics defined under the AACSB accreditation guidelines. These include: graduation rates, internships and placement, pass rate of professional tests, ratio of full time tenure track faculty, admission and enrollment growth, etc.

RAP-2B

SELF-SUPPORT OPERATIONS

Dept/Auxiliary: Applied and Advanced Studies in Education/EdD

Division: Academic Affairs

Fund Code(s): SF001

Fund Description: Education Doctorate

Prepared By: Drs. Ulanoff and Hafner/Rosa Cessna

Mission Statement

Core Values and Program Goals - The Ed.D. in Educational Leadership at CSULA is built around four program goals.

- **Justice**. Educational Leadership in the Service of Justice, Access and Social Change
- **Knowledge**. Leadership Grounded in Knowledge and Expertise in Teaching, Learning and Organizational Change.
- Engagement. Leadership that Engages with the Broader Community
- Critical Reflection. Critical Inquiry and Reflection Embedded in Leadership Practice

1. Operational Overview - Describe the services provided. (Include detailed description of objectives; type of services provided to the University and constituent(s), the operational impacts, and how the operation will further the objectives and success of the University). Operate a doctoral program in educational leadership (EdD) in accordance with CSU policy, WASC standards and state mandates in the Charter College of Education. Provide advising, mentoring and instructional services to doctoral students including teaching, and supervision of students' dissertation research, and activities that foster a doctoral culture among faculty and students (provide research supports, conference attendance, host symposia, provide a student lounge/workspace, etc). Graduate pratitioner/scholars who have earned the Education Doctorate and who will apply what they learned from their research to educational challenges and reforms in the arenas which they find themselves in – these almost always impact High school or Community College students that will matriculate at Cal State LA.

2. Measurable Outcomes - How is Success Defined?

Retention, persistence, graduation and time to degree rates of students enrolled in the EdD program. Outside review and evaluation of the quality of completed dissertations. Alumni career advancement.

3. Sustainability Plan – How will you continue to achieve operational success? (Use of funds, detail how objectives were met; if applicable, justify future use of any increase in funding). To continue operational success, as enrollment increases (cohort size doubled in AY 16-'17), a three year operational and budget plan will need to be developed that also responds to the recent Academic Program Review study of the program. The plan will continue the current administrative and infrastructure support: EdD Director and Post-Secondary Coordinator, Admin Support Coordinator, Division Chair who maintain service and support for EdD faculty and students through the Doctoral Program Office, conduct recruitment activities, process admissions and enrollment, organize and coordinate various activities that support a doctoral culture such as travel to research conferences and on campus research symposium, assist with and monitor program planning and graduation requirements, etc. It is anticipated that increased instructional services will be needed to support the 50% increase in cohort size in this upcoming year.

Doctoral faculty are reassigned from their teaching duties in other college programs to teach courses for the EdD program, faculty teaching Lab courses provide ongoing advisement for doctoral students, dissertation chairs earn 3 units and dissertation committee members earn 0.5 units or professional development funds for supervising doctoral students' dissertation research. Additional faculty will need to be engaged to support increased enrollment.

Representing Cal State L.A., graduates and current students participate in research symposiums and research conferences sharing findings from their research projects. As the current cohort advances in the degree progression, more research support will be needed. Plans are also underway to implement a Leadership Fellows Program for graduates of the EdD program in which Fellows participate in mentoring and program enhancement activities with current students for a one year appointment.

4. Assessment Method - How will the outcomes identified in #2 be specifically measured?

Ongoing collection of cohort data for the first three years in the program monitor retention, persistence and graduation. Additional data collection on students who remain enrolled in the program beyond three years will be collected as well as, data on students who withdraw from the program, graduation rates both by cohort and for all students completing the doctorate will be evaluated withcareful monitoring of time to degree data. Student surveys are also used to continually improve the student experience of the program and supports needed for their success.

Completed dissertations will be reviewed and evaluated every 5 years cohort by outside scholars or practitioners who hold a doctorate to provide the program with data on quality of dissertations produced in the EdD program. In addition, we will begin surveying graduates about career advancement.

RAP-2B

SELF-SUPPORT OPERATIONS

Dept/Auxiliary: CCOE

Division: Academic Affairs

Fund Code(s): SF001

Fund Description: CCOE/CalState TEACH

Prepared By: Dr. Ernest Black

Mission Statement

Preparing creative, collaborative and reflective teachers for California's future

1. Operational Overview - Describe the services provided. (Include detailed description of objectives; type of services provided to the University and constituent(s), the operational impacts, and how the operation will further the objectives and success of the University).

CalStateTEACH is an online CSU teacher preparation program that prepares candidates for a Preliminary Multiple Subject Credential. This credential qualifies candidates to teach in self-contained general education classrooms in California. CalState TEACH is a statewide program with regional offices currently located at Fresno State and CSU Los Angeles. The program is part of the Teacher Education and Public Schools Program based out of the Office of Chancellor reporting directly to Dr. Marquita Grenot-Scheyer, Associate Vice Chancellor of Teacher Education and Public Schools Program. Additional information can be found at the CalState TEACH website at www.calstateteach.net.

2. Measurable Outcomes - How is Success Defined?

Success is two-fold. Success can be determined by the numbers of credentials recommended by the CalState TEACH program. The State of California also looks at the numbers of teacher candidate who take and pass CSET, RICA, and CalTPA or edTPA and the number of attempts it took to pass. CalState TEACH has close to a 95% pass rate. However, a deeper level of success as defined by the US Department of Education is based on K-12 student improvement. The K-12 student improvement is primarily founded in base line results for the Common Core testing. Our program, to that end, could define success on how our program completers fare in the K-12 classroom environment in the role as teacher. We will choose to look at success by observing both of those barometers.

3. Sustainability Plan - How will you continue to achieve operational success? (Use of funds, detail how objectives were met; if applicable, justify future use of any increase in funding).

Sustainability can be met by continuing to increase our number of students. We have consistently done this through adverstising, word of mouth, outreach by both the director and faculty, and participation and presentation at conferences. However, this year, our growth has been based on the need for new teachers in the State of California. We have not done the amount of advertising that we have in the past due to meeting our allotment of FTEs. Our numbers of students continues to grow due to word of mouth. Our cutting edge program that uses technology as a means of educated teachers and, in essence, K-12 students, provides teacher candidates with the opportunity to learn self-paced and virtually. This allows CalState TEACH to provide a quality education with little overhead.

4. Assessment Method - How will the outcomes identified in #2 be specifically measured?

We will look at the percentage of teacher candidates who have passed RICA and edTPA as our measurable outcome. We will determine if the trend of percentage of candidates who pass each term increases. edTPA is a new culmination examination that is used is many states across the country. We will compare the California cut score of 49 to the actual score of our teacher candidates to determine how we fare within the State of California. Based on this knowledge, we can determine how the CalState TEACH curriculum should adjust to meet the needs of the teacher candidate and reach the goal of surpassing the cut score. We are in our first term of providing edTPA as a culmination examination.

SELF-SUPPORT OPERATIONS

Dept/Auxiliary: College of Professional and Global Education

Division: Academic Affairs

Fund Code(s): TE441; TE44S, TE44W

Fund Description: Self-Support Prepared By: Donny Hua

Mission Statement

The College of Professional and Global Education (PaGE) provides flexible, relevant and practical educational pathways, preparing individuals and organizations to engage, serve, and succeed in their local and global communities.

1. Operational Overview - Describe the services provided. (Include detailed description of objectives; type of services provided to the University and constituent(s), the operational impacts, and how the operation will further the objectives and success of the University).

PaGE provides:

- Self-support degree programs both on and off campus, including at the Downtown LA campus. Self-support degree programs are designed to be unique, flexible, and collaborative academic undergraduate and graduate programs for working professionals to meet the needs of today's growing marketplace.
- Open University is a community-based and open access program that allows eligible individuals to take Cal State LA classes without being formally admitted to the university. For students not interested in a university degree, Open University allows individuals to pursue personal interests or enhance their professional skills.
- Winter, May and Summer sessions allow matriculated and non-matriculated students to earn
 university credit during semester breaks to make progress towards their degree, complete high
 demand classes, or focus on a single course.
- A variety of certificate programs for working professionals to enhance their job skills and participate in the growing regional and global job markets. Certificate study offers professionals an accelerated and flexible pathway to explore a new career field or build upon their already existing skills for career enrichment or advancement.
- Training for the working professionals to enhance their job skills and participate in growing job markets. Even experienced professionals in their fields require continuing professional education to remain current on new laws and regulations affecting their practices.

• The English Language Program (ELP) provides non-credit English language instruction to English as a Second Language Learners. Through the CORE IEP, ELP offers 15 weeks of instruction to international students, many of whom seek to matriculate at Cal State LA. In addition to the CORE IEP, the ELP offers a variety of short-term programs that are geared toward special audiences, such as industry professional and community members who seek a better comprehension of the English language.

2. Measurable Outcomes - How is Success Defined?

Success is defined by offering programs that generate great interest in the community and classes with high enrollment to generate enough net revenue to cover all College expenses such as overhead, salaries, benefits and operating expenses.

3. Sustainability Plan – How will you continue to achieve operational success? (Use of funds, detail how objectives were met; if applicable, justify future use of any increase in funding).

PaGE will continue to achieve operational success through strategic growth. We can meet this objective by working with colleges, departments and outside entities to develop new programs and strengthen existing programs through marketing and creative program development/assessment. Timely processing of revenue share to the colleges will also ensure available funds for colleges to reinvest back into program development. Increased funding will be used for additional staffing for a rapidly growing college and expansion of our downtown location as well as into other areas.

4. Assessment Method - How will the outcomes identified in #2 be specifically measured?

Outcomes can be specifically measured by the number of courses that are successfully offered with enrollments that generate sufficient revenue from tuition.

SELF-SUPPORT OPERATIONS

Dept/Auxiliary: Student Health Center

Division: Student Life/Dean of Students

Fund Code(s): SF005 & TH452

Fund Description: Student Health Center Operation and Facilities

Prepared By: Monica Jazzabi

Mission Statement

The Student Health Center provides high-quality, affordable health care and health education for the students of Cal State L.A. to preserve and enhance their potential for academic success and personal development. It also seeks to serve as the primary health resource for the University and health advocate for the campus community.

1. Operational Overview - Describe the services provided. (Include detailed description of objectives; type of services provided to the University and constituent(s), the operational impacts, and how the operation will further the objectives and success of the University).

The Student Health Center (SHC) recognizes the University's mission and strives to fulfill its role in furthering its objectives and success. The services include: primary medical care, counseling and psychological services, psychiatric, health promotion and education, pharmacy, laboratory, X-ray, chiropractic, CPR training, dental, massage therapy, nutrition counseling, and optometry. The SHC plays a significant role in supporting student's success as the health of the body and mind is paramount in maximizing potential and performance. Furthermore, the Center assists students in adopting and maintaining a healthy and safe lifestyle that benefits not only them but also the campus community. The other important contribution the Center makes to the University is through its efforts in public health strategies, increasing awareness and enhancing knowledge of health and wellness. To provide comprehensive health services, the SHC needs adequate human and non-human resources. The Student Health Fee is the SHC's primary source of revenue and is used to cover the comprehensive cost of its operation including salaries and wages, benefits, workers compensation insurance, supplies, equipment, and others. In addition, a minimal Health Facilities Fee is used to help sustain the Health Center facility itself and support: building maintenance and renovations, facilities services, furniture, repair, maintenance and replacement of medical/health related equipment, and other facilities costs, as needed.

2. Measurable Outcomes - How is Success Defined?

The SHC strives to provide high quality health services and health education. The organization's success is defined in its ability and observation of improved student's physical and mental health, positive changes in lifestyle choices, decreasing risky behavior, and improving knowledge. On an ongoing basis, the SHC assesses itself through its comprehensive continuous quality improvement program that evaluates and improves many aspects of provided care and services.

3. Sustainability Plan - How will you continue to achieve operational success? (Use of funds, detail how objectives were met; if applicable, justify future use of any increase in funding).

Many factors contribute to the continuously rising cost of SHC operations including increased staffing needs, salaries, cost of benefits, and cost of pharmaceuticals, supplies, equipment, and services. Given the increasing cost of operation, the SHC needs to increase its revenue to sustain the operation. While the SHC continues to receive additional funding from the Student Success Fee to support Mental Health and Health Education, partially offsetting significant negative budget forecasts for those areas in the short term, a structural deficit exists for the operation as a whole and the long-term plan must include increasing and indexing the Student Health Fee to fund the SHC operation fully with a balanced budget. Notably, the current health fee has remained at the same \$82.50 per Semester (\$55/per Quarter) since 2006. Accordingly, the plan must also include an increase to the Health Facilities Fee (currently \$3.00 per Semester) which has not been adjusted since the mid-1980's and is no longer adequate to sustain the Health Center's facilities building maintenance, repair and equipment needs.

4. Assessment Method - How will the outcomes identified in #2 be specifically measured?

It is difficult to fully measure the outcomes of healthcare services. Nonetheless, the SHC will use surveys, suggestions, and data for visits, encounters, outreach activities, educational activities, presentations, etc., to assess its outcomes.

SELF-SUPPORT OPERATIONS

Dept/Auxiliary: 500715

Division: Adm & Finance

Fund Code(s): TP471

Fund Description: Parking Fines
Prepared By: Carmen Gachupin

Mission Statement

To provide sustainable transportation programs and commuting information to the campus community. The overall goal is to reduce the number of vehicles arriving on campus by reducing the carbon blueprint.

1. Operational Overview - Describe the services provided. (Include detailed description of objectives; type of services provided to the University and constituent(s), the operational impacts, and how the operation will further the objectives and success of the University).

The Transportation Program offers various commuting incentives to employees. There are various options to driving to campus such as riding the bus, taking the train, carpooling, bicycling, walking or using a carsharing program.

Employee commuters are offered monthly subsidies and incentives when they choose an alternate mode of commuting to the campus, other than driving. These efforts reduce the demand for parking, reduces traffic congestion, saves energy and vehicles emissions. The objectives of the transportation program support the university's mission in providing activities that contribute to personal enrichment, development, and institutional pride.

2. Measurable Outcomes - How is Success Defined?

Employees are surveyed every year to identify their daily commute options to arriving to work. The information obtained from the annual survey is collected and a report is produced showing employees' commute trends and the university's average vehicle ridership (AVR).

The results of the commuter survey are used to prepare the mandated Air Quality Management District plan which provides detailed information on each commuter's travel modes, total miles traveled and emissions reduced. Reaching the target AVR can be met by the continuous increase in ridership on the various commuting options available to the campus community.

3. Sustainability Plan - How will you continue to achieve operational success? (Use of funds, detail how objectives were met; if applicable, justify future use of any increase in funding).

Revenue from parking fines are regulated for the use of alternate modes of transportation programs. It is imperative that revenue for these programs continue to steadily increase to allow the availability for increased commuter subsidies and the opportunity for more programs to help reduce vehicle trips and emissions. Funding for the maintenance of electric vehicle charging stations and carsharing programs is also vital for the continuous and long-term success of meeting sustainable goals.

4. Assessment Method - How will the outcomes identified in #2 be specifically measured?

The results of commuters' surveys allows us to evaluate current commuting programs and initiate new and innovative options than driving alone. For example, density maps showing clusters of employees residing in nearby areas can be used to explore carpooling or vanpooling options. The frequency of train and bus arrivals can be an incentive in itself to encourage employees to use transit as an alternate mode of transportation. The commuter surveys also bring awareness to employees and by incentivizing programs, encourages them to consider alternate options.

SELF-SUPPORT OPERATIONS

Dept/Auxiliary: 500710

Division: Adm & Finance

Fund Code(s): TP472

Fund Description: Parking Fees

Prepared By: Carmen Gachupin

Mission Statement

To provide safe and accessible parking to the campus community and visitors. The overall goal is to provide quality customer service, guidance, safety and information.

1. Operational Overview - Describe the services provided. (Include detailed description of objectives; type of services provided to the University and constituent(s), the operational impacts, and how the operation will further the objectives and success of the University).

Parking permits sold to faculty, staff, students, visitors and guests as per Administrative Procedure 402. The parking program is self-funded and revenues from this program are used to build and renovate parking facilities, maintain parking lots, operate expenses and fund salaries for parking personnel.

The Parking Program provides information and guidance, traffic control, crowd control, vehicle battery jumps and vehicle unlock services to the campus community. The objectives of the parking program supports the university's mission in providing high quality professional services to all constituenties of the university.

2. Measurable Outcomes – How is Success Defined?

Every service call is documented and tracked to improve services in the parking areas. When parking officers provide traffic control to vehicles arriving on campus, there is a better flow of traffic and minimized congestion overall. When drivers need services such as a battery jump or a vehicle unlock, parking officers provide that service expeditiously in order to have a vehicle removed expeditiously from a parking stall and made available to another driver.

The parking pay stations around the parking lots are frequently serviced. When a user experiences a malfunction, they call the number listed on the machine and a field technician is immediately dispatched to service the station.

The Parking & Transportation Service Center is a cashiering satellite for the sale of parking permits, transit passes, bike locker rentals and parking citation payments. The Center is open extended hours to accommodate the campus community during the first week of each school term, including Saturdays.

3. Sustainability Plan – How will you continue to achieve operational success? (Use of funds, detail how objectives were met; if applicable, justify future use of any increase in funding).

Parking Services allows for parking purchase options to the campus community such as: on-line, parking pay stations or at the Parking & Transportation Service Center. As parking rates continue to increase, providing these options allows the campus community to plan and budget this expense to meet their needs.

Discounted parking is available at the university's off-site parking facility. The campus community is encouraged to use free shuttle service to/from this location. These efforts help minimize the traffic congestion and parking demand on campus.

4. Assessment Method - How will the outcomes identified in #2 be specifically measured?

Point-of-sale and cashiering systems provide reporting features that can measure the outcomes identified in #2. Revenue and sales reports are measured and compared to prior school terms to identify new trends. Adjustments to field operations, processes and customer service hours are made to meet the demands of new trends.

SELF-SUPPORT OPERATIONS

Dept/Auxiliary: Housing and Residence Life
Division: Administration and Finance

Fund Code(s): TH531

Fund Description: Housing Operating

Prepared By: Rebecca Palmer- Housing and Residence Life, Director

Mission Statement

As a community of scholars, in support of the university, we endeavor to build residents' capacity for academic acheivement, leadership and global citizenship.

1. Operational Overview - Describe the services provided. (Include detailed description of objectives; type of services provided to the University and constituent(s), the operational impacts, and how the operation will further the objectives and success of the University).

Housing and Residence Life supports the academic mission of the University by providing a living/learning community for nearly 1,000 students. We provide all aspects of residential facility including managing student accounts/billing, mail services, marketing, facilities maintenance, and a summer conference program. In addition, Housing and Residence Life provides academic and educational support, peer counseling, crisis/emergency response, and oversees all student behavior issues through our services and community programming.

Housing Objectives:

- Provide affordable housing for Cal State L.A. students.
- Provide students with a safe, supportive, and academically conducive environment the fosters learning and personal growth.
- Develop and grow our portfolio to meet student demand/need.
- Invest in staff members by supporting ongoing professional development.
- Continue to improve the current portfolio and bring the facilities to a standard that remains desireable to our residents.
- Offer a dining program that students like, is nutritional, and a good value for their money
- Enhance student services that make processes and procedures easier to follow and complete.
- Maintain ongoing and appropriate marketing strategies for prospective students.
- Develop living/learning communities that support a diverse student population.
- Continue partnerships with University departments in order to provide appropriate services and support to students (Public Safety, UAS, Financial Aid etc.)
- Maintain fiscal responsibility for future growth and sustainability of all aspects within Housing administration, human resources, student services, and facilities.

Research shows that students who live on campus -

- Meet more people and make more friends
- Are more satisfied with their college experience
- Are more likely to earn a higher grade point average
- Are more likely to obtain a baccalaureate degree in 4 years
- Are more involved in academic and extracurricular activities

Alexander Astin Study 1977,1993 Gregory Blimling Study 1994

Housing and Residence Life mission is to meet the overall goals of the University. Our department strives to have a positive impact on individual student success, overall graduation rates, and personal student growth.

2. Measurable Outcomes - How is Success Defined?

- 1. Significant increases in students' GPA
- Faster completion rates
- 3. Enhanced student personal growth, leadership, and citizenship
- 4. Student satisfaction
- 5. Housing rates remain affordable
- 6. Improvements to facilities
- 7. Staff training and development
- 8. Marketing is effective in recruiting prospective residents
- 9. Housing is a supportive environment to diverse student populations

3. Sustainability Plan – How will you continue to achieve operational success? (Use of funds, detail how objectives were met; if applicable, justify future use of any increase in funding).

Housing will continue to invest funds in order to meet our mission in Housing as well as the University's mission. We continue to make strides towards our goals while also continuing to build our reserves. We are currently working on a Housing development study to expand our portfolio in order to meet current student demand.

Future increase in funding will go to support additional staff training, increased RA staff for the increased number of freshman students, development of Halisi Scholars Housing, furniture replacement, community area renovations, and staff meal plans.

4. Assessment Method - How will the outcomes identified in #2 be specifically measured?

Housing utilizes a variety of assessment methods:

- 1. Annual student satisfaction survey- provides feedback from students on our services, facilities, dining, Residence Life programs etc.
- 2. Program Assessments- RA's conduct program assessments based on the student learning outcome for each program (each method is different depending on the program).
- 3. Annual staff evaluation- staff will provide the department leadership feedback on their individual experiences working in Housing.
- 4. Analysis of contracting trends, comparisons of our rates to other CSU's and local rental rates
- 5. Increased number of apartments that have been renovated
- 6. Data comparing Housing students' academic achievement to overall student population
