

## We WON!! Thanks to you!

I want to personally extend this thank you to you for helping me throughout the year build, nurture, develop, and mold this CSULA student organization into what it is today.

Your commitment to leadership has given me and my team the courage to do amazing things this year for our community of students at CSULA. It's extremely evident that without community leaders and mentors like yourselves to guide the way, many people wouldn't have the opportunity to showcase their talents to the world. It is through your example that we find our courage to continue to make an impact on the local pool of talent here and beyond.

CSULA is just the beginning and because of your help, we are ready to be the change agents this world needs to make it a better place.

My eternal blessings to you,

Barney Santos
