

## Pre-Dental

"Dentistry is a profession that combines science and technology with helping people to enhance and maintain their oral health. As health care practitioners, dentists diagnose, treat, and help prevent diseases, injuries and malformations of the teeth and mouth. They improve a patient's appearance by using a variety of cosmetic dental procedures; perform surgical procedures such as implants, tissue grants and extractions; educate patients on how to take better care of their teeth and prevent oral disease; teach future dentists and dental hygienists; and perform research directed to developing new treatment methods and improving oral health." -NAAHP Fact Sheet
